INTRODUCTION TO NODE.JS

OKWALINGA SAMUEL

ASSIGNMENT QUESTIONS

- What, why and examples of Node apps
- What is Node.Js?
- What are the advantages of Node?
- What apps have been built with Node?

WHAT NODE JS IS

NodeJS is an open-source server-side runtime environment for executing Javascript code, built on Google Chrome's JavaScript V8 Engine, created for building fast and scalable internet applications.

ADVANTAGES OF NODE

- Allowed JS for fullstack development
therefore synching front end and back end is easier
- Light weight
- Reusable js code/ modules
- Highly scalable and superfast
- Cleaner and more consistent codebase.
- Large ecosystem of open-source libraries
- Easy to learn coz it builds on Js and has a lot
of community support.

SOME APPS BUILT ON NODE JS

- Paypal
- Netflix
- LinkedIn
- Uber
- eBay
- Yahoo
- Mozilla
- GoDaddy
- Medium
